## Setting Up Application Environment Create Flask Project

Flask Project

```
• app.py - Visual Studio Code
                                                                                                            刘 File Edit Selection View Go Run Terminal Help
                                                                                                                            ▷ ~ □ …
      🕏 арр.ру
      C: > SFRA > Flask Project > 🏶 app.py
9
             # main.py
             from flask import Flask
g
             app = Flask(__name__)
$
             @app.route("/")
             def index():
品
                 return "Smart Fashoion Recommender System!"
        11
12
             if __name__ == "__main__":
app.run()
